

MURPHY QUALITY SYSTEM

Murphy Warehouse Company has been ISO 9001 Certified as a Quality Company since July of 2003. ISO 9001 is an International Quality Standards organization. Our high standards in warehousing procedures are recognized and certified worldwide. ISO/Quality is a Management System that verifies our current standards, helps us continuously improve our procedures and enhances our working partnerships with our customers. Our Internal Audit Team conducts monthly audits on various procedures and issues a corrective action on any non-conformity. Every year, we are audited and certified by a nationally accredited, external ISO/Quality Organization.

The Murphy Quality System is all on a computerized, "live" internal database. This guarantees that our procedures are always current to all users. If a procedure is changed, it is changed instantaneously for all users. The Murphy Way is Quality Way.
